Korean – A1

Summary

Web Developer specializing in front-end development. I primarily deal with HTML5 and CSS3, jQuery and JavaScript. My initial education was aimed at working in cosmetics. Unfortunately, my cosmetic career ended due to health problems (allergy to gloves and acrylic substances). Fortunately, I found my passion for design and front-end development.

Skill Highlights

- Creative design
- Meticulous
- Great teamwork
- Adaptable
- Professional
- Communicative

Experience

Makeup Artist, Temporama, (2015–2021)

I participated in three successful Slovenian short films (Govorilne ure, Nebo, Kresnik), which were shown at film festivals across Europe and won several awards, and the series V dvoje, which was shown on TV. I gained a lot of experience in teamwork, communication, and ingenuity when working with actors and other film crew members.

Animator, Riding club Rožnik (2017–2019)

As a volunteer, I helped several times at the Rožnik riding club's summer camps and taught the basics of riding. The job required me to have good organizational skills, up-to-date communication, great responsibility, and reliability.

Beautician, Cosmetic studio Astara (2021)

During the on-the-job training, I upgraded and acquired additional knowledge of cosmetic services.

Front-end web developer, Shopamine (2022)

While training to become a front-end web developer, I wanted the on-the-job experience. The Shopamine team took me under their wing for two months. There I got to know the work in the programmer's office and learned many useful tricks and upgraded my knowledge.

Education

Undergraduate of Cosmetics: VIST, 2020

Web Development 1: SmartNinja, 2021

Website application programmer: Xnet, 2022

Certifications

Microsoft: (to be added)

Udemy: Web Development Bootcamp
